

APPENDIX F

SPECIFICATION OF WORKFLOW PROCESSES

The business requirements presented in the earlier Section 3.4 have been analyzed for structure and content. Structure information plus interviews with DCR staff have been translated into the DCR organization chart presented in Section 1.2, the Logical Data Model in Appendix A, and the Workflow Model in Appendix B. The processes within the workflow have been further examined, organized and characterized into a written set of process specifications. Figure 3.12.01 lays out a diagram of the high-level DCR business processes. These high level processes are:

- Inquiries
- Investigations
- Litigation
- Management Reporting
- Conciliation
- Archiving
- Contract Compliance
- MDRR

Following the high-level process diagram are diagrams that further breakdown the business processes. Finally, Table 3.12.01 lays out a tabulation of the higher-level workflow processes to be incorporated into the contemplated Case Management System. The tabulation indicates the process or sub-process number, process or sub-process name, a description of the workflow process or sub-process, and various attributes of the process.

**MULTIPLE DWELLING REPORTING RULE
WORKFLOW SUB-PROCESSES**

The high-level process diagram above provided the layout of the process organization. The sub-level process diagrams above provided layouts of the next level sub-process making up the high-level processes. To better understand these processes, a table is presented below that clarifies the specifications to these sub-level processes. Table 3.12.01 tabulates actions and attributes used in both higher-level and sub-level workflow processes to be incorporated into the contemplated Case Management System. These are the essential specifications of the DCR workflow processes.

The tabulation indicates the process or sub-process activity number, process or sub-process activity name, a description of the workflow activity, and various attributes of the process. These attributes include time sensitivity, escalation, notifications, roles involved, predecessor activities, successor activities, applications called, and various data and or process attributes, when applicable.

**Table 3.12.01
Workflow Processes**

Activity:		Receive Inquiry Activity Id: <u>01-01</u>
Predecessors: none	Default Expected	
	Completion Time: 00:00:15
